WORK EXPERIENCE

Web Developer

Excel Automation

📅 August 2018 - May 2022

📍 Brunswick OH / Remote

- Redesigned Excel Automations and Eagle Sensors & Controls website providing a more mobile friendly experience.
- Built websites from scratch for company clients.
- Created and oversaw wireframe designs from client requests which made the development process easier.
- Developed user interfaces with modern JavaScript frameworks, HTML5, and CSS3, which improved user satisfaction.

EMC I.T. Solutions

Web Developer / Support Technician

📅 May 2022 - current

- Developed new company website, increasing overall leads as well as providing a better customer experience.
- Worked with a team to provide consistent support to clients maintaining high standards and uptime.

PUBLICATIONS

- <https://plymouthshoreonthebay.com>
- All in once place for Plymouth Shore community members to keep up with their communities news and see upcoming events that will take place.
- <https://bayshorervsales.com>
- Bayshore required a modern looking website that would help them connect with their clients and drive sales up.
- <https://catchthex.com>
- Xpress Sports Training's old website was very outdated and did not highlight what makes them stand out from other training facilities. Their new website showcases what makes them a popular spot for all ages, including Professional athletes from every major sport.
- [Hullout e-commerce](https://hulloute-commerce.com) - Small react app that showcases my skills to create a ecommerce webstore.
- <http://hobbsindpiping.com>
- Created a brand new design from scratch that made it easier for Hobbs' customers to get in touch them.
- <https://roxtecproducts.com>
- Website for Excel Automation using Node.js with the express.js framework.
